

Your support makes a **difference**

AUSTRALIAN
MELANOMA
RESEARCH
FOUNDATION

For 20 years, the Australian Melanoma Research Foundation has been committed to our mission to fund research towards the **prevention, early detection and treatment of melanoma**. With your support, we are able to fund Australia's next great minds and accelerate science **to stop Australia's national cancer**.

One in three Australians will develop a skin cancer. The most dangerous is melanoma.

In Australia, **one person dies from melanoma every 6 hours**.

The direct cost to our health care system of treating melanoma is expected to **exceed \$3b before 2030**.

Over 90% of melanoma **can be treated successfully** if detected early.

Our Impact

30 MELANOMA RESEARCH PROJECTS FUNDED

12 AUSTRALIAN RESEARCH INSTITUTES

OVER \$500K INVESTED

Help stop Australia's National Cancer

Behind every research breakthrough is someone who chose to help. Every dollar brings us closer to a future without melanoma.

Donate

All funding from grants awarded goes directly to researchers, not institutional red tape.

Fundraise

Get together with friends and family for a good cause by hosting a fundraiser.

Partner

Become a corporate or pro-bono partner and give back to the community.

Legacy

Create a lasting impact through a gift in your will or a tribute for a loved one who has passed.

Ending the devastating impact of melanoma requires a **collective effort**.

By supporting research, you are helping **save lives today and protect generations to come**.

-DR WAYNE HARVEY, EXECUTIVE CHAIR

Research is saving lives

AUSTRALIAN
MELANOMA
RESEARCH
FOUNDATION

I'm **deeply grateful to the Australian Melanoma Research Foundation** for their support, which enables me to contribute to the advancement of personalised cancer care and **make a meaningful difference in the lives of those affected by melanoma.**

*Dr Priyanka Rana
Macquarie University*

Developing a multimodal AI model to better guide melanoma treatment decisions.

How we fund research

Our Research Advisory Committee uses a scientific framework to identify key research areas to ensure every dollar makes a difference. Priority is given to innovative research with the potential for high impact, near-term clinical application for melanoma prevention, diagnosis and treatment. Funds are only used for the direct costs of the research and not for institutional overheads, infrastructure or other indirect costs.

Named Grants

Named grants stand as a tribute to the importance of research to **create change for melanoma patients.** Make a gift of \$50,000 or over, and choose to name a grant in honour of a loved one, community group or organisation.

You'll be connected with the grant recipient, updated on the progress of their research and **have the opportunity to see your donation in action.**

Survival rates of advanced melanoma

2011
Less than 10%

2024
Over 55%

Research is saving lives.
